

Subject Index: CIT Vol. 19 (2011), N° 1–4

- 2PC, 71
- 3D visualisation, 177
- Actor programming, 71
- Ad hoc network, 143
- Adaptive Multi-Rate (AMR), 113
- Alpha-beta, 269
- Autocorrelation, 143
- Automata, 11
- Autoregressive modeling, 143
- Bernoulli random variable, 93
- Cellular automata, 105
- Cellular programming algorithm, 105
- Checkpoint, 71, 127
- Class responsibility assignment, 275
- Cloud case studies, 177
- Cloud challenges in business context, 177
- Cloud computing, 25, 177
- Cloud computing business framework, 177
- Cluster analysis, 209
- Cluster federation, 127
- Cluster level, 127
- Component dependency, 1
- Computer networks, 25
- Concurrency control, 71
- Coupling, 1
- Cross-platform experiment, 1
- CUDA, 269
- Data analysis, 193
- Density classification task, 105
- Discriminant image splitting, 255
- Distributed computing, 93
- Education, 209
- Entropy constrained scalar quantizer (ECSQ), 113
- Evolutionary computing, 105
- Facial image analysis, 255
- Fluid stochastic petri nets, 261
- Foldings, 215
- Formal methods, 11
- Frontal facial pose recognition, 255
- Gaussian mixture models (GMMs), 113
- Generative programming, 57
- Genetic algorithm, 105, 275
- GPU, 269
- Handoff, 169
- Hill climbing, 275
- Image retrieval, 247
- Indirect deadlocks, 71
- Interaction systems, 215
- Karhunen-Loeve transform (KLT), 113
- Keywords, 247
- Latency, 93
- Line spectral frequency (LSF), 113
- Link load, 143
- Linked data, 239
- Locking, 71
- Machine translation, 247
- Maintenance system, 193
- Mobility management, 169
- Mobility modeling, 143
- Model updating, 193
- Modeling, 261
- Models, 25
- Models of computations, 11
- Morphological analysis, 247
- Motivation, 209
- Multi-domain switching, 223
- National Health Service (NHS) Trust UK, 177
- Navigation, 155
- NCEEE, 209
- Nested transactions, 71
- New generation networks, 223
- NGN, 223
- Open collaboration, 231
- Organisational sustainability modelling, 177
- P2P live streaming, 261
- Parallel DBMS, 71
- Parallelization, 269
- Particle swarm optimization, 275
- Performance, 1
- Performance analysis, 261
- Polymorphism, 57
- Pose estimation, 255
- Predictive modelling, 193
- Privacy, 25
- Program verification, 11
- QoS, 223
- Quality assurance for ROI, 177
- Query language, 83
- Realtime systems, 11
- Recovery, 71, 127
- Retransmission overhead, 93
- Return of investment (ROI), 177
- Reversi, 269
- Routing, 223
- Scripting model, 57
- SDDS (Scalable Distributed Data Structures), 71
- Search, 155
- Security, 25
- Semantic video analysis, 255
- Semantic web, 239
- Sensor web, 239

Simulated annealing, 275
Software architecture, 193
Software engineering, 11
Speech coding, 113
State Matura, 209
Students, 209
Survivability, 215
Tag clouds, 155
Tag navigation, 155
Tagging systems, 155
Tags, 155
Theory of computation, 11
Throughput, 93
Time series analysis, 143
Topological, 83
Transform coding, 113
Unbounded systems, 215
University, 209
Vector quantization (VQ), 113
Web accessibility, 231
White noise, 143
Wikis, 231
Wireless mobile networks, 169
XML, 83
XQuery, 83
